

IN THE CLAIMS:

Please cancel Claim 7 without prejudice or disclaimer of the subject matter recited therein.

Please amend Claim 8 as follows.

Claims 1 to 7. (Cancelled).

8. (Currently Amended) An A projection display apparatus according to
Claim 7, comprising:

a display panel comprising a rectangular substrate having four sides
including first and second pairs of opposite sides, and a plurality of electrodes disposed along
only the first pair of opposite sides;

a circuit board provided with a drive circuit for driving said display
panel;

a projection lens support provided with a projection lens for projecting
an enlarged image onto a screen; and

a holder for holding said display panel and provided with positioning
means for positioning said holder and said projection lens support, wherein said projection lens
support is positionally aligned and connected with said display panel via said holder by said
positioning means, and wherein said display panel, said projection lens support, and said circuit
board are integrally fixed by fixing screws, and said plurality of electrodes and circuit board are
electrically connected by said fixing screws,

wherein said display panel further comprises shift registers disposed along said four sides, and converters for converting digital signals to analog signals, said converters being disposed along opposite two sides of said substrate.
